\* The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

† The index represents the ratio of each month's clearings (calculated on a three months' moving average) to the average for the corresponding period in the years 1926 to 1930 (taken as 100 in each month). The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels.

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	Total 75 Companies.*	34 Active Shares included in foregoing.

(1) The estimates shown below are based on the Census of 1933 and subsequent quasi-censuses (e.g., Civilian Register, 1943, and Occupation Survey, 1945), and returns supplied monthly by governmental authorities and since July, 1941, by employers for purposes of Commonwealth Pay-roll Tax. (Compiled by the Commonwealth Statistician.)

These index-numbers are compiled from the prices of 20 commodities which constitute at present about 80 per cent. of all exports. The prices of the commodities are multiplied by the average annual exports (production in the case of gold) during the three years, 1933-34 to 1935-36.

## No. 87.—Wholesale Price Index-Numbers—Basic Materials and Foodstuffs.

(Compiled by the Commonwealth Statistician.)

The price quotations in the main have been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials, coal and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

The index-numbers in this table are calculated using the effective price of raw wool for local manufacture, which, since August, 1950, has been the open market (auction room) price less bounty. In previous issues the indexes were calculated using the open market price of wool without deduction of bounty.

\* Represents only such imported commodities as are included in the wholesale price index. This index does not measure changes in price of imports generally.

† Legislation which became effective on 14th December, 1950, had the effect of reducing (by bounty) the price paid for raw wool for local manufacture in Australia below the open market (auction room) price. Such reductions were virtually retrospective to August, 1950. The four groups of index-numbers affected by the price of wool are shown below as calculated on the basis of the open market (auction room) price of raw wool.
